Register now for TRIMM final conference on 23rd-24th October 2014

When
23rd-24th October 2014
10 a.m. - 5 p.m.
[Add to Calendar](#)

Where
[Diamant Center](#)
Brussels, Belgium

Dear Reader,

Register now for the Tomorrow's Road and Infrastructure Monitoring and Management (TRIMM) final conference on October 23rd-24th 2014 at the [Diamant Center](#) in Brussels, Belgium. This meeting is being organised in conjunction with the [European Road Profile User's Group](#) (ERPUG), whose objectives fit very well with the TRIMM project.

The conference will be composed of a mix of presentations from TRIMM and ERPUG. ERPUG will also organise an exhibition and a get-together event including dinner to facilitate networking amongst researchers, manufacturers, companies and stakeholders. You need to pay a fee of 150 Euros if you want to attend the get-together event, dinner and exhibition. A detailed programme will be available in June.

Event organised in cooperation with ERPUG

It has been recognised that Europe needs a forum to share thoughts, experiences, developments, innovations and practices of how to adapt to the ever changing challenges in the area of road surface monitoring. With the American Road Profile User's Group (RPUG) as an example, an initiative has been taken to start a similar European group. ERPUG shares the latest and hottest topics such as:

- Pavement profile measurement.
- Pavement profile analysis.
- Pavement profile quality assurance (QA).
- Pavement surface texture (measurement, analysis, QA)
- Tvre/road noise.

TRIMM final conference

TRIMM is a three-year EU 7th Framework Programme coming to an end in November 2014. The project's contribution to the conference will cover advances in the areas of monitoring of roads and bridges, together with implementation aspects such as indicator framework and added-value of monitoring. The TRIMM presentations will be integrated in the themes of the joint agenda with ERPUG and will cover areas such as the use of 3D images, real time data collection, structural health monitoring and management and much more.

ERPUG activities

If you are interested in making a presentation at the event, please advise leif.sjogren@vti.se as soon as possible. The presentation has to cover the TRIMM/ERPUG objectives.

Sponsors and exhibitors are also welcome at the event and you just need to contact roger.moller@ramboll.se. If you become a sponsor at a certain level, you are entitled to a presentation slot.

Please kindly be advised that you may also separately receive an invitation directly from ERPUG. For more information and updates, see <http://trimm.fehrl.org>.

Yours sincerely,
[Robert Karlsson](#)

- Automated pavement condition survey.
- Rolling resistance and ride effects on fuel consumption and wear and tear on vehicles.
- Data usage at road, project and network levels.
- Innovative contract and performance control.
